

# Guide To PM City

Resource Management Neighborhood

Your assistant on your journey to becoming a PMP

The Crowd Training 2/1/13 PM City 6th edition

# WELCOME TO PM CITY

Congratulations for embarking on the amazing and challenging journey to PM City. You are in good hands. The Crowd Training has designed and developed a course and a guide that aims to make your travels as productive and as effective as possible.

I am your Tour Guide, PM Guy. I will be with you throughout your journey. In some areas, you may see me. In most areas, you will hear my voice. If you ever need to reach me or have questions, use the comment box in the course module you are currently visiting. This way others with similar questions can read my response and enter their own thoughts and comments.

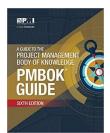

#### USING THE GUIDE

Use this guide to enhance your learning experience and rate of success. Neuropsychological research has shown that the act of writing something down as you are taking in new content helps build lasting connections in your brain. When you only listening passively, you engage with the content in the parts of your brain responsible for listening and auditory sensing. By writing things down, you engage more parts of your brain. Add the act of interacting with The Crowd Training content, you build more connections and involve more learning styles. And if you think about your learning and make connections to your work experience and what your project management work may look like in some other industry or company, then you are making even more connections – that's referred to as metacognition.

Make the learning stick. Use this guide as you progress. Make it your own. The resource is for you. Highlight. Draw pictures. Write as much or as little as you want. Whatever works for you. Space is designated for each knowledge area, process, input, tool and technique, output, and extensions.

The guide is arranged to correspond to the content in the module. You may go in any order. You are not required to follow the course as it is laid out here in the guide.

The guide aligns with the Guide to the Project Management Body of Knowledge (PMBoK®) 6<sup>th</sup> edition. It is highly recommended that you possess a copy of the PMBoK® 6<sup>th</sup> edition – either in digital form or print. If you join PMI as a member, you receive a PDF digital copy that you may print out. Although, at over 750 pages, that is a lot to print. You can purchase a hard copy for around \$50 - \$80. Or you can elect to reference only the PDF version.

If you have suggestions on how The Crowd Training can make this guide even better, don't hesitate to tell us. Email us at <a href="mailto:surfer@mycrowdtraining.com">surfer@mycrowdtraining.com</a>

# RESOURCE MANAGEMENT

Project Resource Management is about the things that carry out the tasks and actions of the project. This means the people (human resources) and equipment/materials (physical resources). You need to determine what the resource needs are and what they should be made of. How many you need; how long you need them for; when you can let them go; from where are you going to get them; what is it going to take it get up to speed; who is going to oversee and manage the resources; and many other questions are the primary concerns
